

ROHS

Gateway has a fully implemented **ROHS** compliance programme and can provide full batch traceability on parts handled within its system. This has been monitored and updated to include **ROHS 2** (2011/65/EU) and **ROHS 3** (2015/863/EU) obtaining confirmation of compliance from our suppliers. Whilst most of the new parts now procured are ROHS compliant, Gateway can provide customer access to stocks of non-ROHS material where this is the required format and which is kept segregated from ROHS material in our warehouse and all quotes and paperwork clearly indicate the compliance status of parts.
